## PROFESSIONAL SUMMARY

Full Stack Software Engineer with ~2 years of experience (including internships) architecting and shipping scalable web applications using **React, Next.js, TypeScript, Node.js, and Python**. Proven track record in leading **React 16 to 19** upgrades, decomposing monoliths into **micro-frontends** and **microservices**, managing high-scale **AWS serverless** backends, and building production **RAG/LLM** pipelines.

## WORK EXPERIENCE

### Software Engineer | InspironLabs Pvt. Ltd.

Apr 2025 – Present · Bengaluru, India

- Deliver full-stack enterprise web features across client teams using **React, Next.js, TypeScript, Material UI, and Redux** on the frontend, paired with **Node.js/Express and Python** REST APIs.
- **[US Healthcare Admin Platform]** Upgraded a multi-branch application from **React 16 to React 19**, resolving a deep backlog of legacy defects and improving load performance via code splitting.
- Decomposed a monolithic repository into **Micro-Frontends (Module Federation)** and decoupled backend **microservices** across separate repositories to prevent cascading service failures.
- Built and documented a shared **MUI + Storybook** component library, standardizing design tokens and accelerating UI delivery across multiple engineering squads.
- **[US E-Learning Platform]** Engineered and maintained a high-scale serverless backend of **1,100+ AWS Lambda** functions to execute asynchronous background jobs without bottlenecking the core app.
- Developed the **Next.js** payment service with **Stripe** and independently integrated **RevenueCat** for subscription management, alongside **AWS OpenSearch**, **Kibana** log monitoring, and automated email workflows.
- **[Enterprise AI Knowledge Base – FMCG]** Architected human-in-the-loop data ingestion and review portals, modeling relational database entities for **RAG retrieval** to deliver grounded, context-rich LLM responses.

### AI/ML Intern | ImmverseAI Innovations Pvt. Ltd.

Dec 2023 – Jun 2024 · Nagpur, India

- Prototyped and shipped production **GenAI/LLM** chatbot features on top of hosted LLM APIs, driving a **22% increase** in user engagement.
- Wired LLM API calls into the existing backend architecture with structured prompt handling, token optimization, and resilient error fallbacks.
- Benchmarked emerging AI models and developer tools each sprint, publishing concise evaluation reports that shaped the product roadmap.

### Full Stack Java Developer Intern | Asterisc Technocrat Pvt. Ltd.

Oct 2022 – Dec 2023 · Nagpur, India

- Built modular features using **JSP, Servlets, and Hibernate**; refactored shared business logic into reusable modules to cut UAT defects by **15%**.
- Executed end-to-end development tickets spanning SQL schema updates, backend controllers, frontend views, and production server deployments.
